SUMMARY

Frontend Engineer with 8+ years of experience building scalable web applications across multiple industries. Experienced with JavaScript (ES6+), TypeScript, Vue.js, React, Nuxt.js, Inertia.js, SSR, Storybook, Vitest, React Native, CI/CD, E2E testing, and REST APIs. Strong background in reusable component architecture, performance optimization, and modern frontend development. Also experienced with PHP, Laravel, and WordPress.

EXPERIENCE

Flosum — Front-end Engineer (Contract) April 2026 – Present

- Building a DevOps platform for Salesforce release management, including version control, deployment pipelines, pull requests, and multi-provider Git integration.
- Developing a Vue 3 + TypeScript single-page application with strict typing, modular Pinia stores, and a composable architecture for scalable and maintainable frontend code.
- Implementing an adapter-based design system on top of PrimeVue and a shared component library, establishing a Storybook-driven workflow, and enforcing code quality through automated linting, type-checking, and pre-commit hooks.

Technologies: HTML, CSS, TypeScript, JavaScript ES6+, Vue 3, Pinia, PrimeVue, Storybook, REST API, Git.

Flightradar24 — Front-end Engineer October 2021 – March 2026

- Developing an internal web application as a new single-page application with SSR; refactoring legacy code to improve maintainability and performance.
- Responsible for creating new reusable components and functionality, implementing new features, and writing unit and integration tests.
- Performing deep refactoring of legacy frontend codebase, improving code quality and long-term scalability.

Technologies: HTML, CSS, Tailwind CSS, TypeScript, JavaScript ES6+, Vue 3, Pinia, Inertia.js, REST API, Vite, Vitest.

Holar Software — Front-end Engineer November 2019 – July 2021

- Worked on medium to complex web and mobile applications; also participated in backend development.
- Responsible for creating composable code, building reusable components, optimizing applications, and refactoring, writing unit and integration tests, E2E tests, and Storybook.

Technologies: HTML, CSS, SCSS, BEM, JavaScript ES6+, React Native, Redux, Vue.js, Vuex, Nuxt.js, SPA, SSR, PHP, Laravel, WordPress (Sage9, Bedrock), REST API, Composer, NPM, Webpack, Cypress, Jest.

Livo — Front-end Developer June 2019 – November 2019

- Worked on complex internal single-page applications, developing and maintaining SPAs with SSR.
- Responsible for implementing new features, integrating REST APIs, and enforcing CSS and JavaScript coding standards.

Technologies: HTML, CSS, SCSS, BEM, JavaScript ES6+, Vue.js, Vuex, Nuxt.js, SPA, SSR, REST API, NPM, Webpack, Git

DDB Tbilisi — Web Developer August 2018 – June 2019

- Worked on external medium projects as a front-end and back-end developer; created and updated custom WordPress plugins and themes.
- Responsible for project documentation, writing composable code, and managing package and framework version updates.

Technologies: HTML, CSS, SCSS, JavaScript ES6+, Vue.js, SPA, WordPress (Sage9, Bedrock), Laravel, Composer, NPM, Webpack, Git

Redberry — Web Developer May 2017 – August 2018

- Developed craft design on the Laravel platform and WordPress themes; assisted as a front-end developer on complex projects.
- Responsible for clean, bug-free code across personal and team projects.

Technologies: HTML, CSS, JavaScript ES6+, jQuery, PHP, WordPress, WooCommerce, Twig, Blade, Composer, NPM, Gulp, Git

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Frameworks & Libraries: Vue 3, Vue.js, Nuxt.js, React Native, Inertia.js, Laravel, Pinia, Vuex, Redux.

Styling: Tailwind CSS, SCSS/SASS, BEM

Testing: Vitest, Jest, Cypress.

Build Tools: Vite, Webpack, NPM, Composer

CMS & Backend: WordPress (Sage9, Bedrock, Twig), WooCommerce, PHP, Laravel, REST API

Other: Git, SSR, SPA, Agile/Scrum.
